INTRODUCTION

1.1 GENERAL

The role of electricity sector in an economy hardly needs to be emphasized. Notwithstanding the substantial development made in the power sector in the country, most of the regions in the country are still suffering from shortage of electricity. Adequate capacity addition and its utilization in most optional manner is the most important aspect of the power development.

Commensurate with the capacity addition, an extensive network of transmission and distribution has been developed over the years for evacuation of power generated and utilizing the same by the ultimate consumers. The new capacity additions call for further strengthening of the transmission system. The transmission capacity addition programme is continuously monitored by the Power System Project Monitoring Division in the Central Electricity Authority.

1.2 MONITORING

The objective of Project Monitoring as enunciated under Section 73(f) of the Electricity Act, 2003 is to ensure timely completion of the schemes. The objective of monitoring is realized through the managerial techniques of “Planning & Control”. The two deliberative elements of Planning & Control are inter-dependent and are essential to every phase of capacity additions in the transmission systems.

The primary responsibility arising under the planning element is the finalization of the Programme of Construction activities of transmission works for the year and laying down the general principles on the basis of which it will operate. These general principles basically involve availability of the finances, land, supply of materials and various statutory clearances

to undertake construction works etc. The construction programme for the year is finalised and distributed properly into the four quarters of the year.

The finalized targets for year 2009-10 for transmission schemes are shown in Table 2.1.

1.3 ROLE OF CEA

The Central Electricity Authority is a key institution in promoting and assisting the timely completion of the schemes for improving and augmenting the electricity system. The Power System Project Monitoring Division which acts as a facilitator in expediting construction of the transmission schemes and renders valuable assistance to the Utilities in solving their problems like ROW problems and arranging various clearances like forest clearance from MOE&F etc.. The site visits by the officers of the Power System Project Monitoring Division and holding “Review Meetings” regularly in the Central Electricity Authority with the Utility representatives. This inter-action provides an excellent ground to identify bottlenecks and the action required to ensure completion of schemes as per targets.

1.4 PROGRAMME FOR 2009-10

Review meetings were held with various State Power Utilities and Central Utilities e.g. PGCIL & DVC during November 2008 to February 2009 to identify the transmission programme to be completed in the following year i.e. 2009-10. Detailed discussions were held by the CEA officers with the representatives of various agencies regarding the on-going physical performance during the year 2008-09. Based on the inputs given by power utilities, the programme of construction of Transmission lines and Sub-Stations (220 kV and above), for the year 2009-10 has been finalized.

CHAPTER – 1

TRANSMISSION CAPACITY ADDITIONS DURING 2008-09

The programme for construction of transmission works (220 kV and above) during 2008-09 for evacuation of power from generating stations as well as for strengthening of power system network was envisaged in the beginning of the financial year 2008-09 on the basis of capacity addition programme. The net achievement of the transmission capacity additions during the year as compared with the previous year is given below.

A. TRANSMISSION LINES:-

(All figures in ckm)

	TRANSMISSION CAPACITY ADDITIONS DURING 2008-09				
	Prog. 2008-09	Ach. (upto Mar 08) 2008-09	Ach as % of prog. 2008-09	Ach. 2007-08	Growth as % of 2007-08
765 kV lines	653	564	86.4	370	152.4
± 500 kV HVDC	1250	1180	94.4	120	983.3
400 kV lines	8025	6827	85.1	6947	98.3
220 kV lines	6493	4171	64.2	4160	100.3

B. SUBSTATIONS:-

(All figures in MVA/MW)

± 500 kV HVDC CONVERTER TER.	0	0	0.0	500	-
HVDC B/B S/S	0	0	0.0	0	-
765 kV S/S	0	0		4500	-
400 kV S/S	9885	7995	80.9	10265	77.9
220 kV S/S	14943	11234	75.2	9658	116.3

While reviewing the progress during 2008-09 it is worthwhile to mention that the associated transmission works for the following projects were completed but could not be commissioned due to delay in the commissioning of Generating Units:-

- (a) Kahalgaon STPP (3x500 MW)
- (b) Sipat STPP-I (3x660 MW)
- (c)RAPP Extn. (2x220 MW)
- (d) Neyveli TPS Extn. 1x250 MW)

Details of year wise Targets Vs Achievements of Transmission Lines and Sub-Stations for various voltage level is given in tables 1.1(a), 1.1(b).

CHAPTER – 2

CONSTRUCTION PROGRAMME OF TRANSMISSION SCHEMES FOR THE YEAR 2009-10

The construction programme of transmission schemes (220 kV and above) for the year 2009-10 was formulated in consultation with Central and State Power Utilities during the meetings with Central and State power utilities and are listed in the Annexure.

± 500 kV HVDC lines of 1580 Ckm for transfer of 2500 MW inter-regional power has been planned for the current year. This includes the construction of ± 500 kV Balia-Bhiwadi line along with converter and with electrode stations by POWERGRID. The programme of construction of 765 kV, ± 500 kV HVDC, 400 kV and 220 kV transmission lines for the year 2009-10 is 632 Ckm, 280 Ckm, 9548 Ckm and 7303 Ckm respectively and the programme for transformation capacity additions at 500 kV HVDC, 400 kV and 220 kV levels is 2500 MW, 13230 MVA and 14386 MVA respectively during the year. The above programme also includes the slipped programme of 2008-09. All the transmission works is being monitored expeditiously for commissioning as per schedule.

The quarterwise programme of various utilities in the country for transmission lines and Sub-Stations has been shown at Table 2.2(a) & (b) respectively for the year 2009-10.

The detailed Line wise and Sub-Station wise target as envisaged in the beginning of the year and revised are shown at Annex- I & II. The programme includes mainly the power evacuation lines associated with generating stations.

TABLE – 2.1
ABSTRACT OF THE CONSTRUCTION PROGRAMME OF
THE TRANSMISSION SCHEMES (220 KV AND ABOVE)
FOR THE YEAR 2009-10

ANNUAL ACTION PLAN

TRANSMISSION LINES (CKM) :

Voltage Level	Quarter (2009-10)				Total 2009-10
	1st	2nd	3rd	4th	
765 kV	50	73	250	259	632
+/- 500 kV					
HVDC	160	120	0	0	280
400 kV	1512	2031	3210	2795	9548
220 kV	1237	1609	1987	2470	7303

SUB-STATIONS (MVA/MW) :

Voltage Level	Quarter (2009-10)				Total 2009-10
	1st	2nd	3rd	4th	
765 kV	0	0	0	0	0
+/- 500 kV					
HVDC	0	0	0	2500	2500
400 kV	1575	3150	5670	2835	13230
220 kV	2635	3766	3070	4915	14386

NOTE: - The details of the construction programme of transmission lines and transformation works (220 kV and above) for the year 2009-10 utility wise are given in table – 2.2(a) and 2.2(b).

TABLE - 2.2(a)

CHAPTER 3

TRANSMISSION LINES AND TRANSFORMATION CAPACITY EXISTING AT THE END OF VARIOUS PLAN PERIODS IN INDIA

The transmission line capacity addition (220 kV and above) during various plan periods till end of 2nd year of 11th plan at various voltage levels viz 765 kV, ± 500 kV HVDC, 400 kV and 220 kV are indicated in table 3.1(a) and 3.1(b). Similarly, the transformation capacity (220 kV and above) during various plan periods till end of 2nd year of 11th plan at various voltage levels viz 765 kV, 400 kV, 220 kV sub stations and ± 500 kV HVDC, HVDC (Back-to-Back) terminals are indicated in table 3.2(a) and 3.2(b). These tables provide information regarding the achievement vis-à-vis programme of transmission works during various plan periods.
