Central Electricity Authority &

Ex-Officio Secretary to Govt. of India

FOREWORD

The report "Transmission Capacity Addition during 10th Plan and Programme of Construction for 11th Plan" is being brought out by CEA in fulfilment of its obligations under Section 73(f), (i) and (j) of the Electricity Act, 2003.

Task of collection, scrutiny, compilation of data and monitoring of the transmission projects of 220 kV and above (132 kV in certain vital cases as well as in all states of North-Eastern Region) has been entrusted to Power System Project Monitoring Division of Central Electricity Authority.

This report covers details of transmission schemes commissioned during the 10th Plan period. During this period, about 46,000 ckm EHV lines and 77,700 MVA/MW transformation capacity was added in the country against the programme of 81,700 ckm EHV lines and 1,28,430 MVA/MW transformation capacity envisaged as per the 'Report of Working group on Power'. The reduction in the transmission system capacity was matching with the capacity addition of 21,180 MW achieved during the 10th Plan against the original programme of 41,110 MW.

For 11th Plan period, a target of 95,283 ckm EHV lines and 1,82,561 MVA/MW transformation capacity have been proposed as per 'National Electricity Plan'. All the transmission schemes of central sector proposed for commissioning during the 11th plan have been included in the report. The report also contains the construction programme for the year 2007-08 for intra-state and inter-state transmission system.

It is hoped that this report would serve as a useful guide to all those who are involved in the planning, construction and monitoring of Indian power sector.

6 GENERATION PROJECT WISE TRANSMISSION SCHEMES OF 11TH
PLAN

Associated Transmission Schemes (ATS) for Generation Projects for
XI Plan

CHAPTER – 1

EXECUTIVE SUMMARY

1.1 INTRODUCTION :

The role of electricity sector in an economy hardly needs to be emphasised. Most of the regions in the country are suffering from acute shortages of electricity and thus the capacity additions and its utilization in the most economic manner remains the most important aspects of the power development.

An extensive network of transmission and distribution has been developed over the years for evacuating power produced and utilizing the same by the ultimate consumers. The new capacity additions in generation further call for additions in the transmission systems. The Power System Project Monitoring Division in the Central Electricity Authority is continuously monitoring these additions in the transmission schemes.

1.2 MONITORING

Monitoring is a control function. The objective is realized through the managerial techniques of “Planning & Control”. The two deliberative elements of Planning & Control are essential to every phase of capacity additions in the transmission systems. They are inter-dependent functions, for the one loses its significance without the other.

The primary responsibility arising under the planning element is the determination of the Programme of Construction for the year and laying down the general principles on the basis of which it will operate. These general principles basically involve availability of the finances, land and various statutory clearances to undertake construction works etc. Once the construction programme for the year is decided and distributed properly into the four quarters of the year, the control function comes into play.

The control function is generally exercised by comparing of actual results with pre-determined programme or targets and taking corrective measures where deviation occurs. There are several phases to the effective use of monitoring functions, the achievements of programme is certainly of first importance.

1.3 ROLE OF CEA

The Central Electricity Authority is a vital Institute in promoting and assisting the timely completion of the transmission schemes. The Power System Project Monitoring

Division which acts as a facilitator in expediting construction of the transmission schemes and renders valuable help to the Utilities in solving their problems like technical, financial and arranging various clearances like forest clearance from MOE&F, Air Port Authority, Railway etc. The site visits by the Officers of the Power System Monitoring Division and the “Review Meetings” held in the Central Electricity Authority with the Utility representatives provide an excellent ground for inter-action to identify bottlenecks and action required to ensure completion of schemes as per targets.

1.4 **CONTENT**

The Report comprises of six chapters. In the present chapter the role of Central Electricity Authority and the monitoring principles are summarily discussed.

Chapter-2 mainly focuses on the transmission capacity addition and fund utilized during the 10th plan period. During this period about **46000 ckm** of EHV lines and transformation capacity of **77700 MVA/MW** was added in the country and expenditure of Rs. 44740 crores incurred.

Chapter-3 presents the transmission lines and transformation capacity additions (220 kV and above) during various plan periods till the end of 10th plan in India.

Chapter-4 presents the fund requirements for transmission schemes (220 kV and above) during 11th Plan period. The requirement of funds for transmission systems represents the indicative figure of Rs. 1, 40,000 crores.

Chapter-5 have the construction programme of the transmission schemes (220 kV & above) for the year 2007-08 of all the utilities. A total of 12508 ckm. EHV lines and 25624 MVA/MW transformation capacity has been programmed for addition in the year. This chapter also contains construction programme of the transmission schemes for year 2008-12 (Central Sector) as provided by CPUs.

Chapter-6 indicates the detail of Generation Project wise Transmission Schemes of 11th Plan.

CHAPTER – 2

TRANSMISSION CAPACITY ADDITION & FUND UTILIZED DURING 10TH PLAN PERIOD (2002-07)

The programme for construction of transmission works as per the report of working group for power during the 10th plan period for evacuation of power from generating stations as well as for system strengthening, 81,700 ckm of EHV transmission lines and 1,28,430 MVA/MW transformation capacity was envisaged. The capacity finally added was about **46000 ckm** EHV lines and **77700 MVA/MW** transformation capacity. The details are furnished below:-

A. TRANSMISSION LINES:-							(All fig. In CKM)
	Transmission capacity addition during 10th plan period						Total 10th plan
	10th plan Targets	2002-03	2003-04	2004-05	2005-06	2006-07	
765 kV	1158	33	102	22	287	580	1024
±500kVHVD C	1134	1134	0	0	0	0	1134
400 kV	23025	3804	3288	5052	6260	7940	26344
220 kV	16025	3019	3728	2795	2871	5223	17636
Total	41342	7990	7118	7869	9418	13743	46138
B. SUBSTATIONS:-							(All fig. In MW / MVA)
765 kV	2331	0	0	0	0	0	0

220 kV	34171	5465	8422	9162	7505	9580	40134
Total	76892	12960	14887	13312	17770	18767	77696

Growth during 10th plan period :-

The growth of transmission line capacity during the 10th plan period vis-à-vis 9th plan period was 135.32%. Similarly, the growth in transformation capacity during the same plan period was 138.37%. The year wise and voltage wise performance indices of transmission lines and transformation capacity are furnished below:

PERFORMANCE INDICES OF TRANSMISSION LINES ADDITION DURING 10TH PLAN PERIOD VIS-À-VIS 9TH PLAN PERIOD

Voltage Level	9 th plan	10 th plan	Growth over 9 th plan period in %age
765 kV	1160	1024	-
±500 kV HVDC	2304	1134	-
400 kV	13236	26344	99.03
220 kV	17393	17636	1.39
Total	34093	46138	35.32

PERFORMANCE INDICES OF TRANSFORMATION CAPACITY ADDITION DURING 10TH PLAN PERIOD VIS-À-VIS 9TH PLAN PERIOD

Voltage Level	9 th plan	10 th plan	Growth over 9 th plan period in %age
±500 kV HVDC TER.	2000	4000	100.00
HVDC B/B	1500	1000	-
400 kV	20460	32562	59.14
220 kV	32187	40134	24.69
Total	56147	77696	38.37

Salient features of 10th Plan

The emergence of 765 kV voltage level in the Indian Power System was an important milestone during this plan period as 1024 Ckm of 765 kV lines were constructed though these are expected to be operated presently at 400 kV. Besides the above 1000 MW B/B sub-stations at following locations were also added to facilitate the regulated transfer of power between the regions:

- a) Sasaram (500 MW)
- b) Gazuwaka (500 MW) (Pole-II)

The Utility wise and year wise achievements for 10th plan period are furnished in table 2.1 & 2.2. The complete details of the transmission lines and transformation capacity completed in all respects are furnished in Annexure – I & II respectively.

Fund utilized during 10th Plan:

The requirement of funds for transmission systems 220 kV and above, (66 kV and above in North-Eastern Region) for 10th Plan period works out to be ***Rs 44740 crores*** excluding the states of Sikkim who could not furnish their proposals. Table 2.3 depicts the Utilitywise fund utilized for transmission schemes in 10th Plan period (2002-07).

Brief evaluation of transmission construction regime during 10th plan: -

In spite of the fact that programme envisaged during various years of the 10th plan period have been met, yet there still remains some inadequacies/missing links/bottlenecks at the end of the 10th plan from the planning perspective and thus affecting the stability of the Power System network. The main constraints dominated in 10th plan for transmission works are as follows:

1. Delay in land acquisition.
2. Lack of provision of land compensation in the Act for transmission lines.
3. Delay in the commissioning of the generating projects.
4. Availability of funds with the utilities.
5. Contractual, ROW, law and order problems and court cases.
6. Delay in forest clearance.
7. Dropping of transmission works by the utilities on account of non-development of the load in the area/region.
8. Delay in Railway clearance.
9. Delay in Airport authority clearance.
10. Delay in Defence clearance.
11. Inter utility coordination problems.
12. Problem of transportation of heavy equipments in hilly areas.
13. Problem of theft of tower parts and conductor etc.
14. Shortage of equipment manufacturers.
15. Delay in supply of equipments.
16. Shortage of skilled and semi skilled man power.
17. Shortage of T&P.
18. Abandoning site by contractor.
19. Delay in approval of Design/Drawings
20. Delay in custom clearance of imported equipments
21. Inadequate number of bidders

CHAPTER 3

TRANSMISSION LINES AND TRANSFORMATION CAPACITY ADDITIONS DURING VARIOUS PLAN PERIODS IN INDIA

The transmission line capacity additions (220 kV and above) during various plan periods till the end of 10th plan at various voltage levels viz 220 kV, 400 kV, 765 kV and \pm 500 kV HVDC are indicated in table 3.1(a) & 3.2(b). Similarly, the transformation capacity (220 kV and above) during various plan periods till the end of 10th plan at various voltage levels viz 220 kV, 400 kV, HVDC (Back-to-Back) and \pm 500 kV HVDC terminals are indicated in table 3.2(a) & 3.2(b). These tables provide much insight into the achievement in the construction of transmission works, as the achievement vis-à-vis programme during various plan periods has also been incorporated.

Additions of transmission lines and transformation capacity (at 400 kV and 220 kV levels) during various plan periods are also shown in bar charts. The details of 765 kV and \pm 500 kV HVDC transmission lines as well as HVDC (Back-to-Back) and \pm 500 kV HVDC converter station capacity are given below: -

As on 31.03.2007

1. 765 KV TRANSMISSION LINES (CKm) :

(Operating at 400 kV)

Central Sector	1775
State Sector	409
Total	2184

Details of 765 kV lines (completed):

1. Anpara-Unnao S/C 409 ckm
2. Kishenpur-Moga (W) S/C 275 ckm
3. Kishenpur-Moga (E) S/C 287 ckm
4. Tehri-Meerut ckt-I 186 ckm
5. Tehri-Meerut ckt-II 184 ckm
6. Agra - Gwalior ckt-I 128 ckm
7. Bina - Gwalior S/C 235 ckm

2. ± 500 KV HVDC LINES :

Central Sector	
1. Transmission lines	4368 CKM
2. Converter terminal	7000 MW
State Sector	
1. Transmission lines	1504 CKM
2. Converter terminal	3000 MW

3. HVDC B/B SUB-STATIONS :

	(MW)
Central Sector	3000
State Sector	0
Total	3000

Details of 3000 MW under Central Sector :

Details of +/- 500 kV HVDC lines :

1. Rihand - Dadri (1634 ckm) with 1500 MW terminals at Rihand and Dadri each.
 2. Chandrapur-Padghe (1504 ckm) with 1500 MW terminals at Chandrapur and Padghe each.
 3. Talchar-Kolar (2734 ckm) with 2000 MW terminals at Talchar and Kolar each (2X1000 MW pole completed at Talcher and Kolar each).
1. VindhyaChal --- 500 MW
 2. Chandrapur ---- 1000 MW
 3. Gazuwaka ---- 500 MW (Pole-I)
 4. Sasaram ---- 500 MW
 5. Gazuwaka ---- 500 MW (Pole-II)

CHAPTER – 4

FUNDS REQUIREMENTS FOR TRANSMISSION SCHEMES FOR 11TH PLAN PERIOD

The funds requirements for transmission schemes for the 11th Plan period was worked out during the Review Meeting held in the Power System Project Monitoring Division from November 2006 to March 2007 in consultation with utilities. The requirement of funds for transmission works in India (220 kV and above) works out to be Rs. 1,40,000 crores.

The transmission function still remains with the public sector utilities that are heavily dependent on the plan outlays for undertaking construction programme. At times, the plan allocation, though meager, is not made available to these utilities by the State Governments. Even in some cases, the plan allocation is made available after deducting the dues outstanding against these utilities from PSUs. The other sources of financing transmission schemes like International and domestic financial institutes etc. are also drying up as these Utilities do not meet the norms set by such institutions. Utilities own contribution, however, is marginal. All these aspects are contributing towards slower growth of capacity addition in transmission network.

Table 4 depicts the Utility wise fund requirements for transmission schemes for 11th Plan period (2007-12).

CHAPTER – 5

CONSTRUCTION PROGRAMME OF TRANSMISSION SCHEMES FOR THE YEAR 2007-08 AND FOR YEARS 2008-12 OF 11TH PLAN

The construction programme of transmission schemes (220 kV and above) for the year 2007-08 was formulated in consultation with Central and State Power Utilities and approved by Central Electricity Authority in different meetings.

The programme envisaged for the year 2007-08 for transmission lines and transformation capacity is furnished in Table 5.1.

Table 5.2 depicts the summary of utility wise programme of construction of the transmission Lines (220 kV and above) and transformation capacity respectively for the year 2007-08. Details are given in Table 5.3 & 5.4.

Construction Programme of transmission lines and transformation capacity for the years 2008-12 (next years of 11th Plan) is enclosed at Table 5.5 & 5.6 respectively.

CHAPTER – 6

GENERATION PROJECT WISE TRANSMISSION SCHEMES OF 11TH PLAN

Generation Project wise transmission schemes of 11th plan are given at Annexure – III. Many of the schemes are under construction and remaining are either at tendering or at engineering stage.

Utility wise schemes are furnished in Annexure-III. For year 2007-08 mostly schemes incorporated are finalized by the concerned utilities and or approved by CEA.

For remaining years of 11th plan period the utilities who have not furnished the schemes in that case only CEA approved schemes have been taken.

Annexure-III
